STRENGTHS

Adaptability

Proven ability to quickly learn and implement new technologies, programming tools, and operating systems efficiently. Capable of adapting to changing project requirements and understanding new technical concepts with ease.

Problem Solving

Strong analytical and logical thinking skills with the ability to debug complex code, identify system issues, and optimize data models for improved performance and accuracy.

Collaboration

Experienced in working within academic teams and collaborative environments while effectively communicating technical and analytical concepts. Able to contribute productively to group projects and maintain clear coordination with team members.

PROJECTS

Know Your Blood 2025 - 2026

Built a Python-MySQL health analytics system for real-time data analysis, visualization, and automated patient health classification.

LANGUAGE

English
Hindi
Bengali

ABOUT ME

MSc Data Science student with a background in Computer Science, proficient in machine learning, statistical modeling, and data analysis. Experienced in working with complex datasets to develop efficient, scalable solutions. Strong understanding of software development principles, enabling seamless integration of analytical models into real-world systems.

EDUCATION

2022 - 2025

University of Calcutta

Bachelor of Science (B.Sc.) in Computer science

2025 - 2027

JIS University

Master of Science (M.Sc.) in Data Science

TECH SKILL

Python

Skilled in Python for data science, with experience in data analysis, visualization, and applying basic machine learning techniques.

SQL

Skilled in SQL for data extraction, transformation, and analysis using relational databases.

JAVA

Proficient in object-oriented programming, problem solving, and backend application development using Java.

Others : C, HTML, JavaScript, CSS
